Presidents and Directors of Georgetown University	We will perform a total of eightborings on the proposed site. The borings will be extended to depths on the order of 30 feet below existing grades. The borings will be evenly spaced throughout the site. The borings will be drilled utilizing 3.25-inch hollow stem, continuous flight augers. The borings will be performed utilizing an ATV-mounted drill rig and will generate an approximately 6-inch annulus. Sampling will be conducted using a 2-inch O.D., split-barrel sampler driven into the soil a distance of 18 or 24 inches by a 140-pound hammer falling 30 inches. The samples will be placed in glass jars for geotechnical classification. The purpose of the Phase II Environmental Site Assessment is to evaluate the subsurface environment, where accessible, to determine if the past use of the property has impacted the subsurface soils and groundwater. The scope of service will involve collecting, field screening and laboratory testing of soil and groundwater samples collected from borings advanced across the property. ECS will employ a GeoProbe® direct-push drill rig to collect soil and groundwater samples from

LINDA V TIANO	Roofing Work
Roger Whyte Power House LLC	Install a Temporary 40' x 60' frame tent on terrace for a one-day event on Saturday May 24, 2014.
Melissa Urofsky	Repair flat roof areas are leaking
Catalina Cabral	The condo building just replaced the entire roof. In order to replace the roof, the roofing company had to tear down the old protective railings/decks above each top floor unit. The top floor units all have roof access via a spiral stair case from inside the unit and hatch style opening. The roof was leaking into a few units, so there was no option other than full roof replacement for the entire building, and tearing down all of the existing roof railings/decks.
giuseppe faruggio	repair of existing joist

Jones	Interior renovation work to be done as per plans with new mechanical, electrical and plumbing systems.
Carrwood, LLC	We will perform two soil borings and two infiltration auger probes on the proposed site. The borings and infiltration auger probes will be advanced to depths of 10 feet and 8 feet, respectively. The borings/auger probes will be located within the bounds of the property. The borings/auger probes will be drilled utilizing 3.25-inch hollow stem, continuous flight augers. The borings/auger probes will be performed utilizing an ATV and/or Truck-mounted drill rig and will generate an approximate 6-inch annulus. After geotechnical exploration is completed, the borings/auger probes will be backfilled with bentonite slurry, which has a consistency of two pounds bentonite powder to one gallon water. Borehole/auger probe abandonment will be performed by tremie-grouting via a positive-displacement pump from the bottom of the borehole/auger probe.
Johnson	17 ft. sub floor pressure relief system

Old Town Trolley Tours of Washington, Inc.	The proposed wok consist on drilling one geotechnical soil boring on private property. The drilling methods is hollow-stem auger using a truck mounted rotary drill rig. The boring diameter is 3 1/4 inches by 20 feet depth, and the boring will be grouted backfield permit DDOE regulation, as per site plans, work plans report and DDOE construction application/schematic form.
Robert Garrett District of Columbia	DCCR proposes one geotechnical boring, NEBBC-03, located at the Government of the District of Columbia's, Vehicle Maintenance Complex at 1905 West Virginia Ave. NE. The boring will be 6 inches diameter and 177 feet deep. A monitoring well will be installed at 120 feet below ground surface. A vibrating wire piezometer will be installed at approximately 50 feet below ground surface. 20 foot screened interval will allow for greater representation of site characteristics. The boring will be drilled using mud rotary or hollow stem auger methods, MSDS for drilling mud additives attached. See IDW Management Plan and attached schematics for additional information. Well development will be by air-lift and surge-block methods. Development water will be drummed for appropriate off-site disposal.
Kipp DC	Two freestanding sign 2 feet 6 inches x 5 feet one set 24 lettering KIPP DC:WEBB CAMPUS one set 12 lettering SPRING ACADEMY
