7/28/2016	B1611163	2128 O ST NW, Washington, DC 20037	I have a concrete patio outside my basement door. I just wish to put down some slate over the concrete so it looks a bit nicer. After my lead pipes were replaced the city had made a whole in the concrete and then patched it up but it looks really bad. I will make sure it still drains. Its about 90 square feet of concrete that i will cover with the pavers.	Building	Construction	Alteration and Repair	NA	Permit Issued	54.09	0069 0226	2	2B	DC/R-5-B		Jeremy marcus	No

7/28/2016	SH1600053	950 NEW YORK AVE NW, Washington, DC 20001	Revision to existing permit SH1600033, which is for Lot 0044 Project. This revision is in order to coordinate with adjacent Property Owner's Lot 0045 future excavation and future construction project. Lot 0044 work will excavate the same area and same depth than is already shown on previously approved & permitted plans per SH1600033 and corresponding building permit B1506039. As per the attached Berkel & Company Contractors Plans, the Revision to Lot 0044 work will just involve the Lot 0044 work to drive sheeting & shoring soldier piles deeper by approximately 25 feet in order not to be potentially undermined at a later date by Lot 0045 excavation - due to that Lot 0045 excavation is anticipated to be deeper than Lot 0044 excavation. Also, Lot 0044 work will install eight additional soldier piles at the Lot 0044 Northeast corner, still within Lot 0044 Private Property. This is due to timing-coordination, and two additional soldier piles at the Lot 0044 Southeast corner. 7/7/2016	B1601060	1013 O ST NW, Washington, DC 20001	The project involves the renovation of an existing three story residential row house into an art gallery space to be used for private showings only. The art gallery will not be open to the public with access gained through invitation only by potential buyers. The first and second floors will display the art that is on sale and the third floor will house the sales office. The scope of work includes the interior alteration Level 2 of the existing structure plus a 110 SF one story ground floor addition in the rear. The addition will match the architecture and style of the existing row house. Mechanical, electrical and plumbing utilities and equipment will be reused, where applicable and upgraded as needed. Maintain and restore existing street scape: Archeological mitigation of 51NW256, the archeological component associated with the Emory Church property, located at 6100 Georgia Avenue NW, Washington, DC will commence in June of 2016. The Emory Church is listed in the National Register of Historic Places. Archeological research and field assessment has confirmed the presence of archeological elements on the property related to both the Emory Church and the Civil War military use of the property. In order to mitigate the loss of archeological resources prior to construction on the property, a mitigation work plan that details the archeological research was approved by the DC Historic Preservation Review Board and DC Historic Preservation Office. 7/6/2016	SB1600247	5600 2ND ST NE, Washington, DC 20011	We will perform a total of four soil borings consisting of one soil boring to a depth of 40 feet, one to a depth of 50 feet, and two to a depth of 60 feet below the existing site grades. The borings will be drilled utilizing a 3.25-inch, hollow-stem, continuous flight auger and will generate an approximately 6 inch annulus. After geotechnical exploration is complete, the borings will be backfilled with bentonite slurry consisting of 2lbs bentonite powder to 1 gallon of water ratio. Borehole abandonment will be performed by tremie grouting via a positive displacement pump from the bottom of the borehole. 7/27/2016	SB1600303	1242 MOUNT OLIVET RD NE, Washington, DC 20002	DCCR proposes to drill one geotechnical boring, NEBBC-69, located at 1242 Mount Olivet Road. The boring will be 8 inches diameter and 145 feet bgs, drilled by mud rotary methods. Upon completion of the boring two vibrating wire piezometers will be installed at 110 feet bgs and 140 feet bgs. All drilling generated waste will be drummed, tested and shipped offsite for disposal. In the event the well is not completed within 1 day, the well shall be covered protected from surface water drainage, and the vertical migration of contaminants and other materials through the well casing and well annulus. A locking well cap will be installed and the rig parked over the excavation to prohibit vandalism. No drilling spoils or excavated soils will be used as backfill. See IDW Management Plan and attached schematics for additional information. 7/28/2016	AN1600159	801 PENNSYLVANIA AVE NW, Washington, DC 20004	We need a revision to PERMIT NUMBER AN1600116 which has already been issued. The revision to the permit should be revised to say: Remove and Replace THREE panel antennas and install ONE sled mount. Previous permit only allowed for TWO antennas to be removed and replace from the ALPHA and GAMMA sector. We now have approval from CFA to remove and replace panel antenna from the BETA SECTOR which is why we need to have the previous permit issued, revised and should say, ONE antenna per sector totaling THREE to be removed and replace and installation of ONE sled mount.
