11/4/2015	SB1600035	901 4TH ST NW	GSI plans to drill 5 soil test borings to confirm soil strength with a hollow-stem auger equipped with a split spoon sampler for the SPT N-value tests down to a maximum depth of 60 feet below existing grades. All borings will be drilled to the maximum depth or auger refusal whichever occurs first. The boreholes dimension will be 3.25 inches and shall be grouted upon completion. See attached work plan.	Building	Construction	Miscellaneous	Soil Boring	Permit Issued	38.50	0527 0020		6E		ADAM STROHBECK GEOTECHNICAL SOLUTIONS, INC.	Bob Knopf III - Square 527 LLC	
11/25/2015	EX1600015	3550 CASTLE AVE SW	Locate underground water leak - Bldgs. 5681 and 5683	Building	Construction	Excavation Only	NA	Permit Issued	143.00	0000 0000		8C		ANCHOR CONSTRUCTION	Anchor Construction	No
11/19/2015	SB1600041	1706 V ST NW	A total of two 6-inch diameter soil test borings will be drilled using 2.25-inch continuous hollow stem flight augers. The borings will extend to a maximum depth of 20 feet below current site grades using a truck-mounted drill rig. The samples will be containerized in glass jars for geotechnical classification and laboratory testing. The borings will be left open for a period of 24 hours to collect groundwater information. PVC pipe will be inserted into the holes at the completion of drilling. The PVC pipe will be capped to prevent runoff from entering the bore holes. After groundwater reading the boreholes will be grouted with bentonite slurry 2 lbs of bentonite to 1 gallon of water and the auger cuttings and all other Investigation Derived Waste will be containerized in sealed drums per DDOE permit. 11/19/2015	SB1600040	719 18TH ST NE	A total of three soil test borings will be drilled at the above referenced site for our subsurface exploration. The borings will be drilled using 2.25-inch continuous flight augers. One of the boring will extend to a maximum depth of 30 feet below current site grades. The borings will be drilled using a truck-mounted drill rig. We anticipate that the maximum annular diameter of the holes from the field exploration including the auger flights will be about 6-inches. The soil sampling interval will be every 2.5 feet within the upper 10 feet of the borings, followed by every 5 feet to the maximum depth explored. The samples will be containerized in glass jars for geotechnical classification and laboratory testing. Upon completion of the subsurface exploration, the borings will be tremie-grouted with a bentonite grout in one continuous operation from the bottom of the well upward. The bentonite will be a mix of two pounds of bentonite powder per gallon of water. No additional additives besides potable water will be included into the grout or used during our field exploration. 11/13/2015	SB1600038	1100 6TH ST SW	The work will include the installation of 5 monitoring wells for the purposes of environmental sampling. Three of the monitoring wells will be completed as shallow monitoring wells, 35 feet in depth, and two of the monitoring wells will be completed as deep monitoring wells, 60 feet in depth. The shallow wells will be installed using hollow stem auger and will be completed as 2-inch wells with 10 feet of screen, sand pack to two feet above screen, bentonite seal two feet above sand, and grout to surface with a 60:40 ratio. The deep wells will be installed using hollow stem auger and mud rotary and will be completed with a permanent outer 6-inch casing to 40 feet depth, the well casing will be 2-inch diameter to 50 feet depth, and the well screen will be 10 feet from 50 feet to 60 feet. The wells will be constructed in the same manner as the shallow well. All wells will be flush mounted and will be used for the collection of environmental groundwater samples.
