3/16/2016	SB1600150	923 16TH ST NW	We plan to perform a total of one geotechnical boring on the proposed site. The one soil boring will be drilled in the northern part of the proposed hotel building addition's footprint. The one soil boring will be located within the bounds of private property, and will be drilled to a depth of 60 feet below existing site grades. The boring will be drilled utilizing 4.25 hollow stem continuous flight augers and/or mud rotary drilling. The borings will be performed utilizing a truck-mounted drill rig and will generate an approximate 6 inch annulus. After geotechnical exploration is completed, the boring/auger probe will be backfilled with bentonite slurry, which has a consistency of two pounds of bentonite powder to one gallon of water. Borehole/auger probe abandonment will be performed by tremie-grouting via a positive displacement pump from the bottom of the borehole/auger probe. 3/25/2016	SB1600061	301 FRANKLIN ST NE	A total of four 6-inch diameter soil test borings will be drilled using 2.25-inch continuous hollow stem flight augers. The borings will extend to a maximum depth of 30 feet below current site grades. The samples will be containerized in glass jars for geotechnical classification and laboratory testing. The borings will be left open for a period of 24 hours to collect groundwater information. PVC pipe will be inserted into the holes at the completion of drilling. The PVC pipe will be capped to prevent runoff from entering the bore holes. After groundwater reading the boreholes will be grouted with bentonite slurry, 2 lbs of bentonite to 1 gallon of water, and the auger cuttings and all other Investigation Derived Waste will be containerized in sealed drums per DDOE permit.	Building	Construction	Miscellaneous	Soil Boring	Permit Issued	36.30	3550 0801	5	5C	R-4	DMY ENGINEERING CONSULTANTS	UNITED STATES OF AMERICA

3/11/2016	B1605184	329 EAST CAPITOL ST SE	We have excavated 4 inches of dirt from two areas in the front yard, totaling roughly 260 square feet. The first area being 5.5f x 15f and the second area 18f x 10 f. The dirt was removed in order to bring the grade of the new flagstone pavers down to the same grade as the sidewalks and leadwalks. The flagstone paved walkways and patio areas have already been approved and permitted by the DDOT Public Space Committee. However, I was told that any land disturbance of greater than 50 feet needed a erosion and sediment control site plan. Keep in mind, the excavation has already taken place, but the new flagstone-paved walkways and patio areas have not been installed. Due to the excavation being only a few inches deep, we were not aware that a soil and sediment control site plan was required.add new fence	Building	Construction	Alteration and Repair	NA	Permit Issued	1221.99	0787 0022	6	6B		JEREMY YORK	Sovereign Properties HoldCo Company	No

3/10/2016	B1605416	500 INDIANA AVE NW	Changes to existing permit #B1410452. Changes include: 1- Door #003 has been reversed to swing into the space that it is serving to resolve a door swing conflict between this door and adjacent door #002A. Based upon the submitted and approved occupancy calculations, this door serves a total occupant load of 23, and therefore does not need to swing in the direction of egress. 2- Door #004 has been recessed within an alcove to provide a clear egress path down Secure Corridor JM-000 so that the door swing does not encroach into more than 50 percent of the corridor's travel path. Door #004 will remain out-swinging, in the direction of egress travel from the suite, since it serves to total suite occupant load of 73.
