

Phase Two Guidance Coronavirus 2019 (COVID-19): Guidance for Apartments, Cooperatives, and Condominiums

This document is intended for owners and operators of apartment buildings and condominiums/co-ops during Phase Two. Please note this document is not applicable to facilities that provide healthcare services. **The owners and operators of apartment and condominium residences must implement the following measures to help reduce the risk of COVID-19 transmission amongst employees, residents, and the community.** For additional information, see coronavirus.dc.gov/phasetwo.

Please note that any building employee or contractor experiencing symptoms of COVID-19, or who was recently exposed to someone diagnosed with COVID-19, must not report to work due to the risk of exposing others. Symptoms of COVID-19 may include: fever (subjective or 100.4 degrees Fahrenheit), chills, cough, shortness of breath or difficulty breathing, fatigue, muscle or body aches, headache, new loss of taste or smell, sore throat, congestion or runny nose, nausea or vomiting, diarrhea, or otherwise feeling unwell.

Employees, Residents, and Visitors Must Practice Everyday Prevention Measures

- **Stay at home if you are feeling unwell or if you were recently exposed to someone with COVID-19.**
- **Practice social distancing.** Keep 6 feet of distance between you and other people who are not in your household.
- Avoid physical contact (handshakes, high-fives) with other people.
- You must **wear a mask or cloth face covering** in common areas. A cloth face covering is not a substitute for physical distancing.
 - If respirators or facemasks are required for an employee's regular job tasks, those items must still be worn. Respirators without valves are recommended to prevent the spread of COVID-19.
- Perform frequent hand hygiene (with soap and water or alcohol-based hand sanitizer).
 - Key times to perform hand hygiene include
 - Before eating food,
 - After using the toilet,
 - Before and after putting on, touching, or removing cloth face coverings,
 - Before and after work shifts and work breaks,
 - Before and after services to each guest or resident,
 - After handling guest or resident belongings, and
 - After blowing your nose, coughing, or sneezing.
- For additional guidance for older adults and individuals with chronic health conditions, see coronavirus.dc.gov/healthguidance.

Considerations for Building Owners and Operators

Employee Considerations

- Employers must provide staff with cloth face coverings and appropriate personal protective equipment (e.g., masks, gloves) per their job responsibilities. Gloves must be worn as indicated per routine job responsibilities.
- Employee break times must be staggered as much as possible to maintain social distancing.
- Implement leave policies that are flexible and non-punitive, and that allow sick employees to stay home. Leave policies are recommended to account for the following:
 - Employees who report COVID-19 symptoms,

- Employees who were tested for COVID-19 and test results are pending,
 - Employees who tested positive for COVID-19,
 - Employees who are a close contact of someone who tested positive for COVID-19,
 - Employees who need to stay home with their children if there are school or childcare closures, or to care for sick family members.
- Keep abreast of current law, which has amended both the DC Family and Medical Leave Act and the DC Sick and Safe Leave Law and created whole new categories of leave, like Declared Emergency Leave.
 - Learn about and inform your employees about COVID-related leave provided through new federal law, the Families First Coronavirus Response Act (FFCRA) and all applicable District law relating to sick leave.

Building Considerations

- Building owners and operators must provide supplies to allow for frequent hand hygiene (e.g., soap and water or alcohol-based hand sanitizers with at least 60% alcohol). Hand hygiene products must be accessible in employee and resident areas (e.g., front desk, lobby, work stations, activity rooms, exercise rooms, other common areas, etc.).
- Building owners and operators must provide supplies to allow for cleaning and disinfection in shared spaces.
- Common areas such as lobbies, courtyards, and rooftops may be open.
- Building owners and operators must ensure that proper social distancing and mask/face covering usage is being enforced.
- A plan must be developed for in-unit emergency service requests that minimizes the physical proximity between residents and service providers.
- A building access control plan must be developed that reduces elevator capacity burdens by limiting passengers to 4 people or one household at one time.
- Virtual tours for real estate showings must be used as much as possible.
- Payment via digital platforms must be implemented as much as possible (e.g., online rent payment).
- Signage that encourages appropriate use of face coverings, social distancing, and hand hygiene must be displayed throughout the facility.
- For buildings that support individuals who may be at risk of more severe illness with COVID-19 (such as older adults or those with chronic health conditions), more stringent restrictions must be implemented in common areas and group events such as restricting group sizes to 10 or waiting to allow use until later phases.
- Educate employees, residents, owners, and visitors about COVID-19. Use platforms such as email, websites, newsletters, signage, and flyers to communicate messages. Refer to coronavirus.dc.gov for more information about COVID-19.
- **For residences that offer in-house services (e.g., gym and fitness, retail, entertainment, or transportation),** see additional guidance specific to these areas at coronavirus.dc.gov/phasetwo.

Pools

- If there is a pool, access must be limited to residents only, with social distancing policies in place while people are swimming and on the pool deck area.
- The building must facilitate entry for prescheduled and unannounced inspections of the pool area by DOH or DCRA so that an inspection may be performed;
- The name and contact information of the person responsible for ensuring safety provisions must be prominently posted at the pool area.
- A written plan must be available to address implementation of guidance as provided by DC government.

- The building must be prepared for emergency pool closure order or other restrictions that may need to be enforced by DC Health.
- Your mask or face covering must be worn in common areas, but not in the water.

Avoid Close Contact and Reduce Touchpoints

- Building owners and operators must arrange lobbies, meeting areas, office spaces, break rooms, and other common areas including pool decks or business centers) to ensure at least 6 feet of distance between persons. This may require removing chairs, increasing the distance between tables and chairs, or installing transparent shields or other physical barriers where social distancing is not an option (such as at a front desk).
- Use visual cues to help prevent congregating in areas such as lobbies or front desks.
- Reusable high touch items that are not able to be cleaned or disinfected (e.g., magazines, newspapers, brochures) must be removed from common areas in the facility.
- Non-essential group activities and events must be limited. If offering group activities, implement the following measures to help reduce the risk of COVID-19 spread:
 - Prioritize outdoor activities. Outdoor activities are preferred over indoor, however it is important to understand that **interacting with more people in any setting raises your risk**, so it is important to follow social distancing and cloth face covering recommendations.
 - Limit the number of attendees not to exceed 50 participants, including staff.
 - Provision of food and refreshments is discouraged, but if provided, must be as pre-packaged boxes or bags for each attendee.
 - Stagger activities and arrival/departure times.
 - Attendees must maintain 6 feet of distance from people from other households, as much as possible.
 - Post signage to indicate that individuals must not attend communal activities if they are feeling unwell or have been exposed to someone with COVID-19.

Screening and Monitoring for Symptoms

- Employers must screen (e.g., symptom questionnaires) employees daily, prior to entering the building, over the phone or in person.
 - For **Screening Tool Guidance**, visit coronavirus.dc.gov/healthguidance
- Encourage and remind employees to remain vigilant for fever and other possible symptoms of COVID-19.
- Encourage residents and visitors to remain vigilant about monitoring themselves for fever and other possible symptoms of COVID-19.
- Employers must maintain a record of individuals who use the pool or attend any planned activities for at least 30 days to facilitate contact tracing.

Clean and Disinfect

- The facility must have a comprehensive plan for routinely cleaning and disinfecting common spaces and high-touch surface areas (e.g., front desk, lobby areas, activity rooms, exercise rooms, business centers, laundry facilities, shared restrooms, shared kitchens, elevator buttons, door handles, front desk pens, etc.).
- Any shared employee equipment (e.g., phones, computers, carts, etc.) must be cleaned and disinfected between each person's use of it.
- Any shared equipment provided for the use of residents and visitors must be cleaned and disinfected between users, in addition to being arranged according to physical distancing requirements.
- For more information about cleaning and disinfection in a community building and the disinfectants that are effective against the virus that causes COVID-19, see the CDC

- website: cdc.gov/coronavirus/2019-ncov/community/reopen-guidance.html.
- For more information about cleaning and disinfection when a person has COVID-19, see the CDC website: cdc.gov/coronavirus/2019-ncov/community/disinfecting-building-facility.html.

Building Considerations

- If a building was closed for an extended period of time, remember to check HVAC systems and ensure all water systems are safe to use. For more information, see CDC's Guidance for Reopening Buildings after Prolonged Shutdown or Reduced Operation: cdc.gov/coronavirus/2019-ncov/php/building-water-system.html.

Establish a Plan for COVID-19 Exposure

- A resident being diagnosed in a building is not a risk to the rest of the building, unless they have attended group events or were in common areas while not adhering to social distancing recommendations. This information will be gathered from the individual by the DC Health Contact Trace Team. DC Health does not disclose that an individual has been diagnosed with COVID-19 to apartment or condominium building managers unless the individual has been determined to pose a risk to other residents or staff in the building.
- Establish a plan in the event that an employee is diagnosed with COVID-19.
- Identify a point of contact that an employee can notify if they test positive for COVID-19 and choose to disclose this information.
- If an individual develops any of the symptoms above during the work shift, there must be a plan in place for that individual to immediately isolate, notify their supervisor, and leave the facility.
- If an employee chooses to report that they are positive for COVID-19, the facility must have a notification process to share the following with staff:
 - Education about COVID-19, including the signs and symptoms of COVID-19
 - Referral to the Guidance for Contacts of a Person Confirmed to have COVID-19, available at coronavirus.dc.gov/healthguidance
 - Information on options for COVID-19 testing in the District of Columbia, available at coronavirus.dc.gov/testing
- Establishments must notify DC Health when:
 - An employee notifies the facility they **tested positive for COVID-19** (not before results come back)

AND

 - the employee interacts frequently with residents or visitors

OR

 - if an employee, resident, or visitor who attended an event at the building notifies the facility they tested positive for COVID-19.
- Notify DC Health by submitting an online form on the DC Health COVID-19 Reporting Requirements website dchealth.dc.gov/page/covid-19-reporting-requirements:
 - Submit a **Non-Healthcare Facility COVID-19 Consult Form**.
- An investigator from DC Health will follow up within 48 hours to all appropriately submitted inquiries.

The guidelines above will continue to be updated as the outbreak evolves. Please visit coronavirus.dc.gov regularly for the most current information.
